

SRI RAM SHARMA

Email: contact@sriramxdev.me | GitHub: <https://github.com/sriramxdev>
Portfolio: <https://sriramxdev.me> | Location: Uttar Pradesh, India

Technical Skills

- **Languages:** Python (AI/ML & Backend), Java, C, Go (*Learning*), SQL, HTML, CSS
- **AI / Machine Learning:** PyTorch, Computer Vision, Deep Learning, Local LLM Inference (Ollama), Autonomous AI Agents, Hugging Face Spaces.
- **DevOps & Monitoring:** Docker, Podman, Grafana, Prometheus, Cloudflare Ecosystem, Firebase
- **Databases & Frameworks:** MongoDB, MySQL, PostgreSQL, Supabase, FastAPI, Astro
- **Developer Tools & Operating Systems:** Git, GitHub, JetBrains IDEs, Linux (Fedora / Ubuntu).

Technical Projects

Echo Sync (Edge-Optimized Sign Language Platform as SaaS) Under Development *Project Lead (Team of 4)*

- Leading a four-person engineering team to design a privacy-first, real-time sign language translation system utilizing 3D skeletal landmark tracking via MediaPipe.
- Architecting an edge-optimized framework combining a custom kinematics-based token pruning logic with ONNX Runtime for sub-100ms local inference speeds.
- Developing a secure, high-observability, backend integrated with Prometheus and Grafana for real-time system monitoring.

Zitron (Medical Vision Platform) Under Development *Lead Developer*

- Designing and architecting an end-to-end medical vision model and diagnostic reasoning platform optimized for complex X-ray data processing.
- Designing secure, localized inference pipelines using local computing primitives to ensure strict privacy controls for sensitive medical analytics.

Astride – Local-First Activity Tracker Alpha Stage (GitHub) *Independent Creator*

- Developed a privacy-focused Android pedometer leveraging in-built device sensor processing to eliminate network dependencies, using Kotlin and Jetpack Compose for modern UI.
- Optimized sensor logic to reduce CPU wake-locks, significantly improving background battery efficiency on mobile devices.

Personal Portfolio Platform (sriramxdev.me) Completed *Full-Stack Creator*

- Designed and customized a developer showcase using Astro, Tailwind CSS, and TypeScript.
- Implemented secure global content delivery and custom DNS routing via a self-configured Cloudflare pipeline.

Education

United College of Engineering and Research, Prayagraj Bachelor of Technology, Computer Science and Engineering (AI & ML)	2023 – Present Pursuing
St. Mary's Convent School, Ghoorpur, Prayagraj Class XII (12th Standard) CBSE 2021	82.00%
Class X (10th Standard) CBSE 2019	84.00%

Certifications & Experience

- **IBM Virtual Internship Completed :** Finished intensive modules focusing on enterprise software workflows, development methodologies, and foundational engineering principles.
- **MongoDB Certified Associate Developer** Expected: August 2026
- **GitHub Foundations Certification** In Progress
